MUNICIPAL CORPORATION OF DELHI

Projects Under execution

- A Geographic Information System Cell is being set up for better management of property tax, collection of garbage and refuse and in planning for civic services in the long run.
- Extension of integrated 134 Integrated Citizen Service Bureau so that each ward has one. Services of other departments of government are being brought on this to provide services of various Departments of Govt. of NCT of Delhi to the citizens, such as registration with employment exchange, application for ration card, driving license or getting information about the various processes for different services rendered by the departments to the citizens, payment of Delhi Jal Board bills, etc.
- Computerization of all MCD hospitals.

Proposed in next one year

Development of application software :-

- To automate operations and functions of Engineering Department for efficient monitoring of all relevant activities of construction, development, electrical and other works.
- Personnel Information System to maintain employee specific data for entire service period and generation and electronic disbursement of salary of employees.
- To enable submission of Property Tax returns under self-assessment system and to provide GIS based query to property owners, general public and various users of property tax department.
- Sharda Project : To provide computer-aided learning in 1000 MCD Primary Schools.
